応急物資の確保

震災時の住民の生命と健康を守るため、地方公共団体を中心に、米や乾パン、水、医薬品などの確保体制を推進しています。

(主食等)

米については、災害の発生した都道府県や近隣の都道府県での政府手持米の状況を把握し、災害時の米の円滑な供給を確保するようにしています。

また、災害時の非常食糧として、乾パンや育児用調整粉乳等を備蓄するとともに、関係業界の連絡体制を整備し、災害時の円滑な供給を確保することとしています。

(給水)

災害時の水道施設の破損による断水などに対処するため、地方公共団体において、給水車両などの整備や応急給水槽の設置を進めています。

(医薬品)

国、地方公共団体、日本赤十字社、関係業界等により、医療救護活動に必要な医薬品、医療資機材の調達、備蓄体制の整備が進められています。

Medical supplies stockpile

System for Securing Emergency Supplies

In order to keep the livelihood and health of citizens at the time of disaster, the local governments are improving a system whereby rice, hard-dried biscuits, drinking water, and medical supplies are secured and readily available.

(Staple Food)

The arrangements are made, in order to maintain uninterrupted food supply, to correctly report the quantity of rice the national government stocks in the disaster-inflicted prefecture and neighboring prefectures.

The stockpile of hard-dried biscuits and powdered milk for infants are also maintained, and at the same time the liaison system among the related industries and distribution channels of such products is being improved to ensure the supply.

(Water supply)

To cope with the situation where water supply would be discontinued due to the breakdown of water facilities, the local governments are preparing water supply trucks and emergency water tanks.

(Medical supplies)

The national government, local governments, the Japan Red Cross Society, and related industries proceed to improve on the procurement and stockpiling of medical supplies required for medical relief activities in case of a disaster.
